## DETAILED ACTION

1. Claims 1-11 are pending.

### *Election/Restriction*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-3 and 10-11 in part drawn respectively to polypeptides, classified for example in class 530, subclass 350.

II. Claims 4-8 and 10-11 in part drawn to polynucleotides, vector, host cell and method of making a protein, classified for example in class 536, subclass 23.1.

III. Claim 9 in part drawn to a method for stimulating the assembly of Reelin protein molecules to the extent using polynucleotides, classified for example in class 435, subclass 6.

IV. Claim 9 in part drawn to a method for stimulating the assembly of Reelin protein molecules to the extent using polypeptides, classified for example in class 435, subclass 7.1.

3. The inventions are distinct, each from the other because of the following reasons:

4. Inventions I, and II are related as products. The products are distinct each from the other as the products are comprised of divergent structure, effects and function, for example nucleic acids, and peptides.

5. Inventions III and IV are related as processes. The processes are distinct each from the other as the processes differ in reagents, steps, functions and effects.

6. Inventions I-II and III-IV are related as products and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the nucleic acids and peptides can be practiced with alternative nucleic acids and peptides the products as claimed can be used

Art Unit: 1647

alternatively in a method of treatment, a method of making antibodies, a method of screening compounds, and a method for detecting compositions.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and the search required for any Group is not required for any other Group, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). In order to be fully responsive, Applicant is required to elect a single group from designated groups I-IV, even though the requirement is traversed

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (703) 308-4242.
